NOTES

This Dauphin Island List is drawn from the official records of the Alabama Ornithological Society and contains 347 of the 401 species found in the state. The list includes species found on the Island, Little Dauphin Island, Sand and Pelican Islands, the bridge causeway, Cedar Point and the causeway to the mainland. Taxonomy according to 7th Edition of the AOU Checklist of North American Birds, 44th Supplement, 2003
 This card is provided by the Dauphin Island Bird Sanctuaries.

The Dauphin Island Bird Sanctuaries

The Dauphin Island Bird Sanctuaries, Inc. (DIBS) is a non-profit corporation chartered by the State of Alabama and recognized by the Internal Revenues service as a tax exempt 501 (c) (3) organization.

Our purpose is:

To preserve ecologically valuable stopover habitat on Dauphin Island for neotropical migrant birds

With the support of the National Fish and Wildlife Foundation and many generous donors DIBS has protected the western boundary of the Shell Mounds Park, acquired the grove of ancient live oaks known as the Goat Trees, the lot providing the new exit road from the Audubon Sanctuary, and a number of wet lots in the Gorgas and Tupelo Gum Swamps. Where ever you see this sign

you are viewing habitat now protected, forever.

In a partnership with the Nature Conservancy we are concentrating on acquisitions in the Steiner block (Steinerville) with a grant from Neotropical Migratory Bird Conservation Act Funds.

We need your help!

If you have enjoyed birding on Dauphin Island, help us make that possible for future generations of birds and birders. Make your check out to: Dauphin Island Bird Sanctuaries and mail it to Mary Porter, Treasurer, PO Box 1295, Dauphin Island, AL 36528 and send this along with it so we can provide your gift recognition and keep you informed of our progress.

Dauphin Island An Alabama Bird Sanctuary

Dauphin Island is one of the top birding spots in the Southeast with 347 species having been reported. During spring migration it is the first land-fall for many neotropical migrants making the six hundred mile flight across the Gulf of Mexico from the Yucatan Peninsula. Under adverse weather conditions, large flocks of exhausted birds of many species may seek shelter on the Island in a truly spectacular "fall-out".

Fall migration can also be a very rewarding time on the Island for birders. As early as July, shore birds start gathering to store up energy for their long, trans-gulf flight. This migration period lasts throughout the fall for many different species. There are also numerous permanent residents and the winter season brings a variety of waterfowl, seabirds and shore birds.

The small map shows some of the areas where birds are likely to be found. One should realize that the entire Island is a Bird Sanctuary and that rewarding observations can be made in any of its public areas including parks, beaches, dunes, wetlands and its quiet streets.

The Alabama Ornithological Society meets yearly on Dauphin Island in April and October to enjoy the birding, fine fellowship, and great seafood. Visitors are always welcomed to participate in field trips and other activities.

Anytime is good birding time on Dauphin Island!!!!.
